

Option Control Records
OCR Utility Kit

Requirements To accurately implement the 3.x software upgrade on the Cerato / 20-20 switch, Teltronics, Inc. must validate and compare each customer's current Option Control Record (OCR) configuration with the Release 3.x OCR, before shipping the Release 3.x software package.

To expedite this process, Teltronics developed an OCR Utility Kit that we will ship to all Release 3.x customers, at no charge, before shipping of the Release 3.x software. All customers ordering Release 3.x software must include the OCR Utility Kit (P/N 955335), on their order. Customers must also include the Cerato / 20-20 Customer Site Registration and Order Form with the Cerato / 20-20 Software Release 3.x upgrade order for proper processing, shipping, and warranty documenting.

The following lists all Release 3.x software upgrade packages that require the 955335 - No Charge - OCR Utility Kit on the purchase order:

P/N	Description
CCSSWUP	One-Step CCS Software Upgrade Kit*
CCSSWUP2	Two-Step CCS Software Upgrade Kit**
CCSSWUPM	Multi-Step CCS Software Upgrade Kit***
LCCSWUP	One-Step LCC/LX Software Upgrade Kit*
LCCSWUP2	Two-Step LCC/LX Software Upgrade Kit**
LCCSWUPM	Multi-Step LCC/LX Software Upgrade Kit***
MAPSWUP	One-Step MAP/LH Software Upgrade Kit*
MAPSWUP2	Two-Step MAP/LH Software Upgrade Kit**
MAPSWUPM	Multi-Step MAP/LH Software Upgrade Kit***

*One-Step upgrade kit - for one release prior to the current release.

**Two-Step upgrade kit - for two releases prior to the current release.

***Multi-Step upgrade kit - for three or more releases prior to current release.

 **WARNING**

New installations erase previous software as well as databases. Prudent users will backup databases and retain good copies of their current Release and OCR in case a new install is not successful and re-installation of the previous software is required. Installing the 3.x software will not complete without a converted OCR.
